INTRODUCING OUR NEW ONLINE LUBE GUIDE

ONLINE RESOURCES TO TAKE AWAY THE GUESSWORK

Many of you know that putting the wrong oil in your vehicle can be dangerous and may reduce the life of your engine – but how can you know which oil will compliment your vehicle's make and model?

TOTAL Oil has just launched an online lube guide, with a focus on providing users with a simple, intuitive and intelligent platform to help determine which lubricant is right for their vehicles.

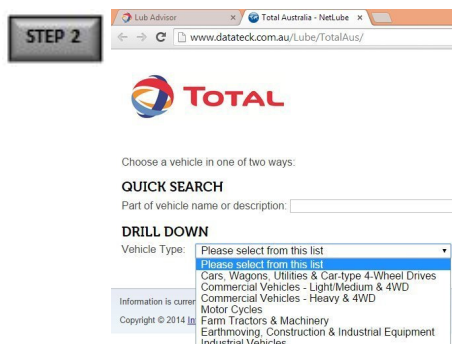

Users can search for their model directly, or select from a list including cars and vans, motorbikes, heavy duty equipment and more. From here, information on the appropriate oil to use is no further than a click away. Results are listed in order of recommendation, and users can select their preference between Elf and TOTAL products. Advice is not limited to motor oil alone, information about which transmission, brake fluid and other products required for your vehicle are also provided, complete with the appropriate intervals for changing these fluids, dictated in both time and kilometres.

The TOTAL online lube guide is a simple and highly effective measure to maximise the longevity of your engine and the safety of your vehicle. To see for yourself, go to totaloil.com.au and look for the Lub Advisor icon.

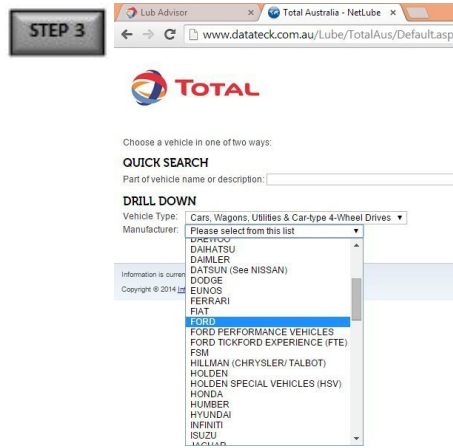

If you have any questions, please do not hesitate to contact us at ONSHORE OILS and we will help in any way possible.

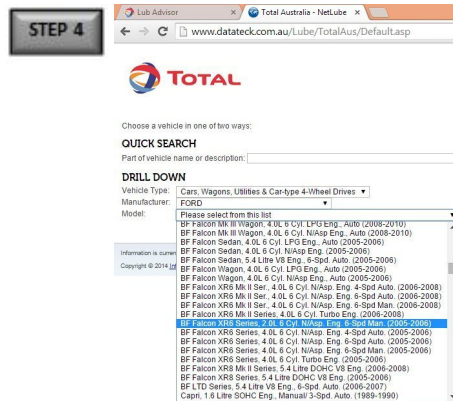

To find the Online Lub Advisor, [CLICK HERE](#) and select either Total or Elf.

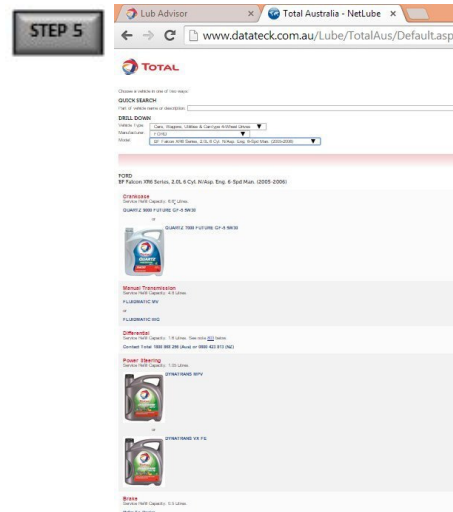

Select your vehicle type from the drop down list or simply use the Quick Search function.

Select your vehicle manufacturer from the drop down list.

Finally, select your vehicle model.

You will then be provided with the lubricant recommendations for your vehicle.

Thanks and stay tuned for a special offer.
