

Total loss lubrication of chainsaw and high speed machinery

APPLICATIONS

Chainsaw

Conveyors

- Total loss lubrication of all high speed machineries :
 - Manual or mechanical chainsaw
 - Chain conveyors
- Suitable in all wood transformation works
- 100 viscosity grade is mainly adapted to the lubrication of mechanical chainsaw installed in wood cutting machineries
- 150 and 220 viscosity grades are particularly recommended for manual chainsaw of woodcutter and also for industrial conveyors.

PERFORMANCES

Antiwear and adhesive oil

- Very adhesive behaviour which reduces spattering and guarantees the lubrication on the entire length of the moving chain.
- Reinforced Antiwear additivation
- Improved Antirust property

CUSTOMER BENEFITS

**Durability
Economy**

- Friction reduction
- Chain and guide wear reduction
- Spattering, pollution and oil consumption reduction

CHARACTERISTICS

MTC	Units	Grades		
		100	150	220
Volumetric mass	kg/m ³	883	879	884
Viscosity at 40°C	cSt	100	150	220
Behaviour		Adhesive	Adhesive	Adhesive
Pour point	°C	-15	-12	-9
